---

## PROJECTS

- **Home Owners Club**  
*React / Laravel / QuickBooks / Microsoft Graph API / RingCentral*  
Developed a multi-role web application for a homeowners community to book services (electricians, plumbers, etc.). Integrated customer support, calendar syncing, and invoicing through 3rd-party APIs. Built a secure, responsive frontend with React and a RESTful backend using Laravel.
  - **Tanshe Limited– Medical Services Website**  
*Laravel / MySQL / Bootstrap*  
Developed a dynamic website for Tanshe Limited, a medical services company, using Laravel. The platform offers information on healthcare services, facilitates appointment bookings, and features an admin panel for managing doctors, departments, and patient inquiries.
  - **Accountable CRM – Loan & Mortgage Services**  
*PHP / MySQL / jQuery*  
Built a custom CRM web application for managing loan and mortgage services. Features include client onboarding, loan application tracking, document management, and agent performance monitoring. Designed to streamline workflows and improve client communication.
